### **Plains, Midwest Face Severe Weather: 'Tornado Risk' for Michigan, Wisconsin**

(NBC News) Around 43 million Americans were at risk of severe thunderstorms that will sweep across the Plains before smashing their way into the Midwest on Monday, forecasters warned. An area stretching from Minneapolis to Detroit — including Chicago — was facing damaging winds, large hail and potentially tornadoes, according to NBC News meteorologist Bill Karins. "Damaging straight line winds are also a threat," said Kevin Roth, lead meteorologist at The Weather Channel. After working their way over the Dakotas, Roth added there would be an "elevated tornado risk, primarily in southern Wisconsin and Michigan." Illinois, Iowa and Indiana could also see twisters and Roth expected more storm and tornado warnings to be issued throughout Monday. "Very large hail" and flash flooding were also possible, according to the National Weather Service.

### **Explosions Rock Afghan Parliament in Kabul; Taliban Claims Responsibility**

(NBC News) Seven militants who targeted the Afghan parliament were killed early Monday after the building was rocked by a series of explosions, officials said. A huge blast was followed by several smaller ones, Senator Nisar Haress told NBC News from a bunker inside the building. Television stations were broadcasting live from parliament when the explosions occurred. Footage showed Afghan Speaker of the House Abdul Rauf Ibrahimi standing at a podium and calmly telling members of parliament that "an electric fault" appeared to be to blame. Female Afghan lawmaker Qazi Rahela Saleem said one explosion knocked her off her seat. Special forces troops were sent to the scene and a gunbattle raged for nearly two hours. The incident began when a Taliban fighter driving a car loaded with explosives blew up outside parliament gates, Kabul police spokesman Ebadullah Karimi said. It was unclear how the driver got through several security checkpoints. Taliban spokesman Zabihullah Mujahid said the militant group was behind the attack, Kabul police chief Gen. Abdul Rahman Rahimi told local TV that all lawmakers were safe. The Health Ministry said that 31 civilians were wounded, including five women and three children. A senior Kabul police official told NBC News that seven attackers were killed and buildings in the area were being cleared. Taliban insurgents have launched complex attacks on government targets in the capital in the past, including the parliament.

# **SITUATION SUMMARY**

## **NORTHERN OPERATIONS FIRES**

### **Washington, Vegetation Fire, Alpine County**

#### **Medical/Health**

- Per National Weather Service Reno: The fire is sending out a smoke plume to the northeast today. Plume forecasts indicate that trend will continue through the evening before smoke settles into the valleys overnight. Communities near the fire and downstream such as Yerington and Fallon are most likely to be impacted with smoke and reduced air quality. Assuming continued fire activity Monday, a similar smoke trajectory is expected tomorrow though probably not traveling as distant due to lighter winds.

#### **Infrastructure/Utilities**

- Per CUEA no threat to the power grid or transmission lines. CUEA will monitor.

## WEATHER SYNOPSIS BY REGION:

### **NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:**

#### **Eureka Weather:**

Stubborn onshore flow will allow some low clouds to persist along the immediate northwest California coast each night and morning through the week. Farther inland, highs will gradually increase to well above normal by the end of the week. Thunderstorm chances will increase over the coming weekend.

#### **Medford Weather:**

Temperatures will be heating up the latter part of the week through at least next weekend for interior locations. Predictions remain fairly consistent showing a ridge building then moving over the Pacific Northwest Friday into the early part of the following week.

#### **Reno Weather:**

High pressure will create hot and very dry conditions this week with record highs likely by Friday. Thunderstorms are possible along the Sierra crest beginning Friday afternoon and evening. There is potential for thunderstorm activity to increase this weekend and early next week.

#### **San Francisco Weather:**

As high pressure rebuilds this week temperatures will warm especially across inland areas during the second half of the week. Onshore flow is expected to continue which will keep coastal areas mild. High clouds will likely increase by late in the week and into the weekend as a moist southeast flow develops aloft.

### **CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:**

#### **Sacramento Weather:**

Cooler weather continues today. Strong warming trend begins Tuesday bringing another round of hot weather for the second half of the week. Possible shower and thunderstorm activity is expected next weekend mainly for the mountains.

#### **Hanford Weather:**

A subtle cooling trend will take place over central California during the first half of the week before temperatures warm again beginning Wednesday.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **SOUTHERN CALIFORNIA:**

#### **Los Angeles Weather:**

An elongated upper ridge will continue to bring above normal temperatures this week across inland areas with a cooling trend into midweek as the high moves east. High pressure will dominate the weather pattern once again by this weekend with the possibility of monsoonal moisture being drawn in from northern Mexico and Arizona by late next weekend into early the following week.

#### **Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:**

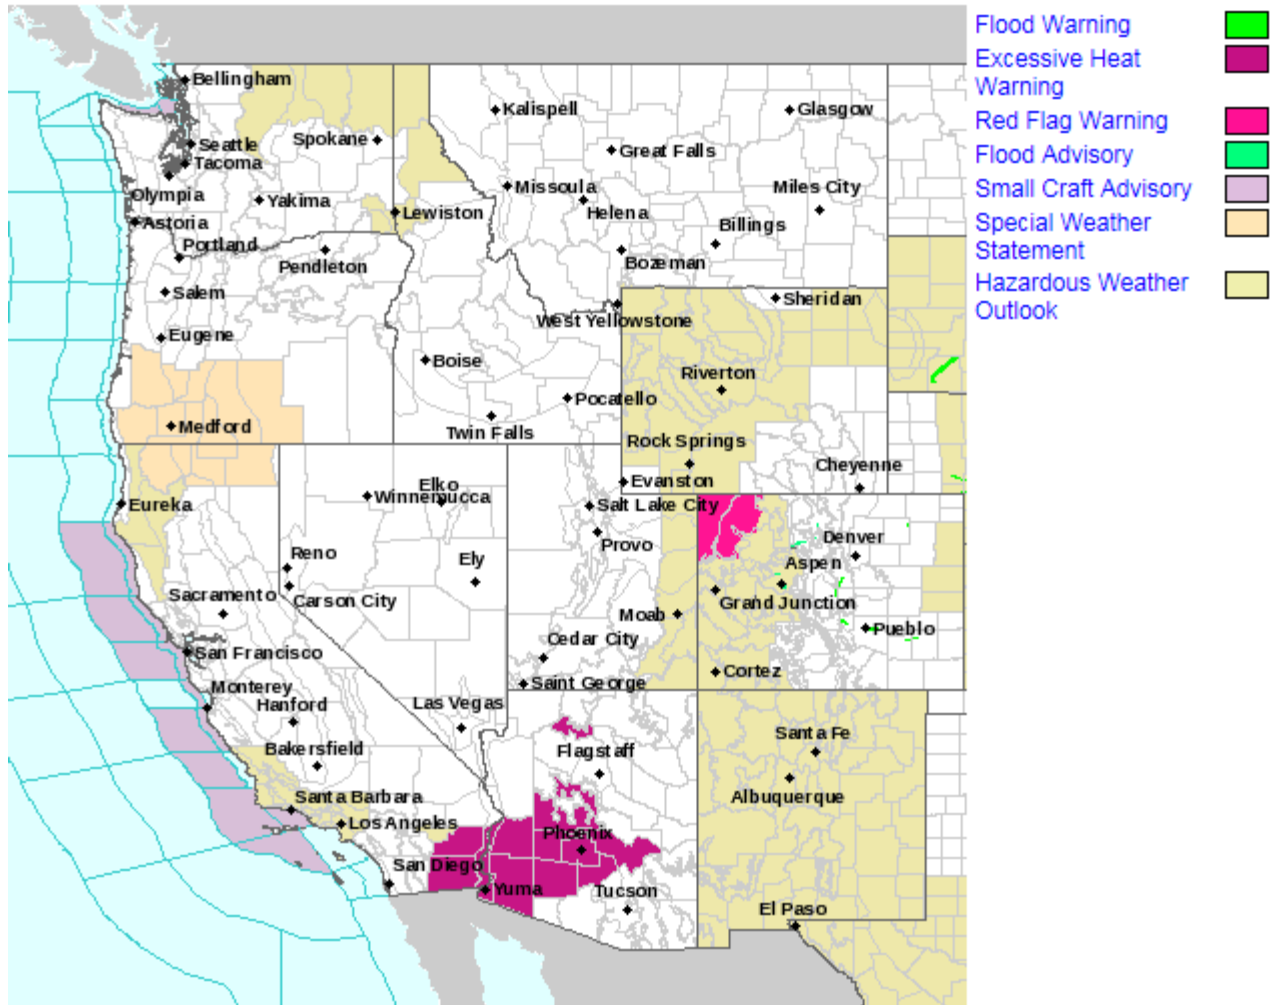

High pressure will slowly weaken across southern California through Thursday with a slow inland cooling trend and with slow deepening of the marine layer. For next weekend through early next week high pressure centered over the Great Basin will begin to direct monsoonal moisture in southeast flow aloft into southern California with small chances for afternoon thunderstorms near the mountains for the weekend. The marine layer will slowly decrease in depth for Friday through early next week.

#### **Southeast California Weather:**

Above normal temperatures will persist through much of the upcoming week, but will retreat from the record-tying values seen last week. Meanwhile, moisture will begin to move into the area from Mexico with increasing chances of mountain showers and thunderstorms from Wednesday onward.
